Personal

- Presentation skills
- Communication skills
- Time Management
- Well-Organized

Experience

Senior Frontend Engineer at I-SOFT INTL.   2/2023 : Present

- **Centralized Inspection System & Electronic Messaging System | Roads and Transport Authority**

  Contributed significantly to front-end development for both a comprehensive inspection system and an electronic messaging system for RTA Dubai. Utilized React and Redux to create responsive web apps, collaborating with a Java back end to implement features like user authentication, vehicle details, inspection results, payments, reporting, messaging, contributing to the efficient flow of RTA's vehicle testing and audit activities.

Mid-Level Frontend Engineer at SAG Techs   2/2020: 2/2023

- **Plato Campus | SAG Techs**

  Instrumental in developing a web app for Plato Campus, a learning management system. Used React and Redux to create a fast, user-friendly interface. Collaborated with a Laravel back end to implement features like course creation, video streaming, quizzes, feedback, and certificates, enhancing the online learning experience.

- **Compass | International Organization for Migration**

  Played a vital role in crafting the front-end of a web app for the Compass initiative. Used React and Redux to create a fast, user-friendly interface. Collaborated with a Laravel back end to implement features like user authentication, service provision, case referral, and reporting, advancing the initiative's global objectives.

- **Upper Egypt Local Development Program | Ministry of Local Development**

  Contributed to front-end development for UELDP's web app in Upper Egypt. Used React and Redux to create a fast, user-friendly interface. Collaborated with Laravel for features like user registration, project details, and progress tracking, ensuring program success.
